Contract Manager

Engineering Consultants Section

RE:

CONSULTANT EVALUATION PROGRAM -- DESIGN CONSULTANT

Flease find attached information in regards to the evaluation of consultants for contracts administered through Engineering Consultants Section, as well as, copies of the <u>MANDATORY CONSULTANT EVALUATIONS</u>, which you are to complete as follows:

- 1. Complete the appropriate Consultant Evaluation Form 5 days after all major design submittal review issues have been resolved.
- 2. Make three copies of the evaluation. Transmit the original to the Consultant. The transmittal letter should be on agency letterhead, filling in the blanks as appropriate (see sample).
- 3. Send one copy each to the Contract Manager and the Contract Specialist in Engineering Consultants Section and keep one copy for your own contract/project files.

If you have any questions or wish to set up an appointment to discuss this, please contact me at (602) 255-7125. Thank you for your cooperation and assistance.

ENGINEERING CONSULTANTS SECTION

CONSULTANT EVALUATION PROGRAM (DESIGN)

January 1994

The Consultant Evaluation Program is a vehicle to open lines of communication between the Project Manager (ADOT or Management Consultant), the Consultant, any Subconsultants and other ADOT staff.

A positive approach to the Consultant Evaluation Program assures that:

- 1. project schedule, cost, and quality of design and construction are attainable, and
- 2. potential problems that may impact other projects or the 5 Year Construction Program are identified and resolved in a timely manner.

The Consultant and their subconsultants are evaluated at major milestones during the life of the contract. These evaluations provide indications of how the project is progressing and what steps have been taken to assure effective and efficient practices during construction. The evaluations are reviewed and logged by ADOT Engineering Consultants Section (ECS). The log is reviewed monthly, or more frequently if necessary, to determine if any trends, particularly negative ones, are developing.

The Consultant Evaluation Program may include visits to the office of the Consultant by ECS Management. At such visits, questions relating to the contract evaluation are addressed and problems are identified.

The following is provided for your use in the evaluation of a design consultant:

- 1. Phasing and Evaluation Schedule. This is a description of the project milestones for the particular type of project (design, construction administration, etc.) and a recommended schedule of filing dates.
- 2. Sample Transmittal Letter.
- 3. Copies of the evaluation forms developed by ECS and the SPAP Committee. Note: Some Management and General Consultants have developed their own forms for the evaluation program. Prior to their use, they must be reviewed and approved by ECS.

PHASING AND EVALUATION SCHEDULE FOR DESIGN PROJECTS

On consultant design contracts, the project design milestones are after the Initial (30%), Preliminary (60%), and Final (100%) design submittals. Contract Constructibility will also be evaluated by District personnel. Evaluations at these milestones provide indications of how the design is progressing and what steps have been taken to assure effective and efficient practices during construction. The evaluations should be completed after all major issues of a design submittal have been resolved. When this schedule is followed the evaluation document is an extension of the design submittal review process.

It is recommended that the letter of transmittal to the design consultant from the Project Manager be similar in content to the attached sample transmittal.

RECOMMENDED EVALUATION FILING DATES

| Initial Design Submittal (30%) | 5 DAYS after all major design submittal review issues have been resolved |
|--------------------------------------------------------|--------------------------------------------------------------------------------|
| Preliminary Design Submittal (60%) | 5 DAYS after all major design submittal review issues have been resolved |
| Final Design Submittal (100%) | 5 DAYS after all major design submittal review issues have been resolved |
| Contract Constructibility (District form will be used) | 5 days after construction is complete and project has been accepted. |

Notes: 1. A design submittal evaluation should not be more than six (6) weeks after the design submittal date.

EVALUATION MEASUREMENTS/COMMENTS

The following measurement standards for performance evaluation factors may be used:

"Above Average" rating is for superior performance which exceeds the Scope of Services without additional costs to the Department. Examples are design and/or construction cost savings, substantial time savings, unprecedented level of community involvement, error free plan submittals, etc. The award of this rating will be infrequent, as Consultants are selected on their qualifications and are expected to produce the best product possible.

"Average" rating is for performance which has met the Department's expectations based on the Scope of Services. Examples are within scope, budget, and on time; acceptable communication and coordination; minimal changes to plan submittals, etc.

"Below Average" rating is for performance which has not met the Department's expectations based on the Scope of Services. Examples are not meeting schedules, exceeding the design and/or construction budgets, major revisions required on plan submittals, poor communication and coordination, etc.

NOTE: Additional comments are required in the space provided for "Above Average", "Below Average" and "Does Not Meet" ratings.

RE: CONSULTANT PERFORMANCE EVALUATION, (Contract No. XX-XX)
(Project Location)
(Project Name)

Mr. (Consultant Name):

Enclosed is a copy of the evaluation which (ADOT Section/Group) has made of your firm's performance during the (Appropriate Phase) of our contract. Subsequent evaluations will be at other appropriate phases of the contract, culminating in a final evaluation at the project completion.

This evaluation was prepared by (Responsible Party Name & Title) who was your direct contact liaison, along with appropriate staff as required.

The purpose of these periodic evaluations is to point out in a timely manner what (ADOT Section/Group) considers as either strong or weak points of your performance on the contract. The goal is to achieve design plans and contract documents which meet ADOT's standards and procedures, which will ultimately lead to the successful construction of the project.

While informal meetings and discussions have occurred we would be pleased to discuss this with you further, if you so desire. A copy of the evaluation has been sent to the Contract Manager, ADOT Engineering Consultants Section, for information. Any written responses you may desire to submit concerning this evaluation should be directed to us, with a copy to the Contract Manager.

Sincerely,

(Project Manager's Name) (Project Manager's Title)

c: ADOT ECS (2)

GENERAL CONSULTANT EVALUATIONS

ARIZONA DEPARTMENT OF TRANSPORTATION

OFFICE MEMO

(DATE)

TO:

ADOT PROJECT MANAGER

FROM:

RON THOMAS

Contract Manager

Engineering Consultants Section

RE:

CONSULTANT EVALUATION PROGRAM -- GENERAL CONSULTANT

Please find attached information in regards to the evaluation of consultants for contracts administered through Engineering Consultants Section, as well as, copies of the <u>MANDATORY CONSULTANT EVALUATIONS</u> which you are to complete as follows:

- 1. Complete the Consultant Evaluation Forms periodically as required by the project for the prime consultant and any subconsultants involved in that time frame. It is recommended that a general consultant is evaluated every six months.
- 2. Make three copies of the evaluation. Transmit the original to the Consultant. The transmittal letter should be on agency letterhead, filling in the blanks as appropriate (see sample).
- 3. Send one copy each to the Contract Manager and the Contract Specialist in Engineering Consultants Section and keep one copy for your own contract/project files.

If you have any questions or wish to set up an appointment to discuss this, please contact me at (602) 255-7125. Thank you for your cooperation and assistance.

ENGINEERING CONSULTANTS SECTION

CONSULTANT EVALUATION PROGRAM (GENERAL)

January 1994

The Consultant Evaluation Program is a vehicle to open lines of communication between the Project Manager (ADOT or Management Consultant), the Consultant, any Subconsultants and other ADOT staff.

A positive approach to the Consultant Evaluation Program assures that:

- 1. project schedule, cost, and quality of design and construction are attainable, and
- 2. potential problems that may impact other projects or the 5 Year Construction Program are identified and resolved in a timely manner.

The Consultant and their subconsultants are evaluated at major milestones during the life of the contract. These evaluations provide indications of how the project is progressing and what steps have been taken to assure effective and efficient practices. The evaluations are reviewed and logged by ADOT Engineering Consultants Section (ECS). The log is reviewed monthly, or more frequently if necessary, to determine if any trends, particularly negative ones, are developing.

The Consultant Evaluation Program may include visits to the office of the Consultant by ECS Management. At such visits, questions relating to the contract evaluation are addressed and problems are identified.

The following is provided for your use in the evaluation of a general consultant:

- 1. Phasing and Evaluation Schedule. This is a description of the project milestones for the particular type of project (on-call, supplemental services, research, construction administration, etc.) and a recommended schedule of filing dates.
- 2. Sample Transmittal Letter.
- 3. Copies of the evaluation forms developed by ECS and the SPAP Committee.

PHASING AND EVALUATION SCHEDULE FOR GENERAL CONSULTANTS

On on-call, supplemental services, research, etc., the period of evaluation of the consultant is left to the discretion of the Project Manager. Where projects are numerous and of short duration, the Project Manager may choose to evaluate the consultant every six months; where the consultant will be working on a small number of longer duration projects, the Project Manager may choose to evaluate the consultant after each project is completed.

It is recommended that the consultant is evaluated every six months and that the letter of transmittal to the consultant from the Project Manager be similar in content to the attached sample transmittal.

RECOMMENDED EVALUATION FILING DATES

Periodic Evaluation * Left to the discretion of the Project Manager.

Contract Renewal * Must be submitted with the Project Manager'a request to extend the

contract.

Contract Completion * After contract is complete.

* Note: Indicate on the form provided the type of evaluation.

EVALUATION MEASUREMENTS/COMMENTS

The following measurement standards for performance evaluation factors may be used:

"Above Average" rating is for superior performance which exceeds the Scope of Services without additional costs to the Department. Examples are design and/or construction cost savings, substantial time savings, unprecedented level of community involvement, error free plan submittals, etc. The award of this rating will be infrequent, as Consultants are selected on their qualifications and are expected to produce the best product possible.

"Average" rating is for performance which has met the Department's expectations based on the Scope of Services. Examples are within scope, budget, and on time; acceptable communication and coordination; minimal changes to plan submittals, etc.

"Below Average" rating is for performance which has not met the Department's expectations based on the Scope of Services. Examples are not meeting schedules, exceeding the design and/or construction budgets, major revisions required on plan submittals, poor communication and coordination, etc.

NOTE: Additional comments are required in the space provided for "Above Average", "Below Average" and "Does Not Meet" ratings.

RE: CONSULTANT PERFORMANCE EVALUATION, (Contract No. XX-XX)

(Project Location)
(Project Name)

Mr. (Consultant Name):

Enclosed is a copy of the evaluation which (ADOT Section/Group) has made of your firm's performance during the (Appropriate Phase) of our contract. Subsequent evaluations will be at other appropriate phases of the contract, culminating in a final evaluation at the contract completion.

This evaluation was prepared by (Responsible Party Name & Title) who was your direct contact liaison, along with appropriate staff as required.

The purpose of these periodic evaluations is to point out in a timely manner what (ADOT Section/Group) considers as either strong or weak points of your performance on the contract. The goal is to achieve design plans and/or contract documents which meet ADOT's standards and procedures, which will ultimately lead to the successful construction of the project.

While informal meetings and discussions have occurred we would be pleased to discuss this with you further, if you so desire. A copy of the evaluation has been sent to the Contract Manager, ADOT Engineering Consultants Section, for information. Any written responses you may desire to submit concerning this evaluation should be directed to us, with a copy to the Contract Manager.

Sincerely,

(Project Manager's Name) (Project Manager's Title)
